

Below is a comprehensive transformation document that gathers your brainstorming notes, room-by-room ideas, and action items into one organized, actionable plan. This report is divided into an overall vision, detailed room-by-room descriptions, a phased roadmap (including immediate MVP tasks versus longer-term enhancements), and a shopping/procurement list. You can use this document as a working blueprint for transforming Pollution Studios into a dynamic film coworking and production space.

Pollution Studios Transformation & Roadmap

1. Overall Vision

- **Purpose:** Transform the existing film stage/studio into a mixed-use hub that serves both as a production stage and a film coworking community.
 - **Dual Functionality:**
 - **Production:** Continue renting out the stage for film/TV/photography shoots with enhanced support (equipment storage, craft services, wardrobe, and makeup areas).
 - **Coworking/Creative Campus:** Create flexible coworking spaces, educational workshop areas, and creative zones (e.g., a café-style kitchen, main coworking area, and specialized rooms such as a writer's room, editing suites, and screening/color grading spaces).
 - **Innovation & Community:** Integrate modern check-in systems, dynamic room occupancy indicators, and inspirational decor (posters, mantras, whiteboards) to promote collaboration and creativity.
 - **Phased Approach:** Start with a proof-of-concept (MVP) focusing on quick wins and basic rearrangements, then roll out more extensive renovations and advanced systems over time.
-

2. Room-by-Room Detailed Plans

A. Main Entrance/Hallway

- **Current State:** Functional but unrefined entry; dim, dingy lighting; unappealing wall fixtures.
- **Planned Changes & Action Items:**
 - Install an **envoy-style check-in system** (e.g., iPad/stand with nametag printing).
 - Replace or supplement existing bulbs with **brighter (potentially Wi-Fi-enabled) bulbs** and add extra fixtures to ensure a vibrant, upscale feel.
 - Remove or update hanging metal dividers that look outdated.

- Enhance the space with **inspirational posters**, clean walls, and **plants** to create a welcoming, creative atmosphere.
- Consider clear, color-coded signage for wayfinding.

B. Equipment Room

- **Current State:** Used for production supplies; currently a storage area that is underutilized/possibly disorganized.
- **Planned Changes & Action Items:**
 - Repurpose as a dual-function space for equipment storage and member gear rental/checkout.
 - Install efficient **shelving systems** and reconfigure storage to make use of vertical space.
 - Improve lighting with brighter bulbs.
 - Develop a **dynamic code system** (or similar self-service system) for members to check out items without staff intervention.
 - Label shelves clearly and consider a basic inventory/tracking system.

C. Kitchen Zone / Coworking Café

- **Current State:** Basic industrial kitchen with tall ceilings; split between craft services for shoots and a potential café feel.
- **Planned Changes & Action Items:**
 - Design for dual use:
 - **Coworking Café:** Add coffee shop–style seating (modular benches, small tables, high tables with stools) for everyday coworking.
 - **Craft Services:** Maintain core kitchen functionality for production shoots.
 - Upgrade lighting throughout with brighter, possibly Wi-Fi-enabled bulbs.
 - Reorganize shelving and storage; consider adding a **second refrigerator** dedicated to member food storage.
 - Increase the number of microwaves and add a water filter for improved tap quality.
 - Explore additional amenities such as an espresso machine, small freezer/vending machine for snacks, and dedicated areas for coffee supplies.
 - Use partitions/curtains to hide unsightly storage or drafty areas (especially near doors leading to restrooms).

D. Main Coworking Space / Creative Campus

- **Current State:** A large open space currently used as a hangout with industrial finishes.
- **Planned Changes & Action Items:**
 - Divide the space into zones for collaboration, individual work, and specialized functions (render farm area, accountability/rec room, movement/stretch zone).
 - Replace or clean existing flooring (consider durable, commercial-grade carpet tiles or rugs).

- Seal drafts from the roll-up door with weatherstripping.
- Incorporate **modular furniture** (flexible seating arrangements, mobile desks) to allow quick reconfiguration.
- Install multiple high-speed Wi-Fi access points.
- Add decorative elements such as inspirational posters, whiteboards, and corkboards for impromptu brainstorming.

E. Green Room / Screening Room / Color Grading Suite

- **Current State:** Functional green room with dated furnishings and subpar flooring.
- **Planned Changes & Action Items:**
 - Replace outdated leather couches and upgrade flooring to a more modern, easy-to-clean surface.
 - Install an **85" calibrated display** for accurate color grading and screenings.
 - Improve sound treatment (acoustic panels, upgraded fixtures) to optimize the room for critical listening.
 - Add optional projector and modular screen system for flexible presentations.
 - Integrate decorative hanging shelves with curated books and posters to inspire creativity.
 - Consider partitions to separate areas for simultaneous editing and client screenings.

F. Photo Studio / Multipurpose Production Space

- **Current State:** 15'x15' photo studio with exposed wood beams; used for small shoots.
- **Planned Changes & Action Items:**
 - Enhance as a multipurpose studio that can double as a workspace.
 - Install a **seamless backdrop system** with interchangeable rolls (for different colors/backgrounds).
 - Create a designated high table with stools along one wall for work sessions.
 - Add storage shelves or a closet unit for photo supplies and props.
 - Ensure flexible layout options so the space can serve as a secondary coworking area if needed.
 - Improve sound isolation (reinforced door/soundproofing materials) to maintain a quiet environment during shoots.

G. Main Office Area / Workshop & Classroom

- **Current State:** Large office area with a central table and various seating; underutilized for educational purposes.
- **Planned Changes & Action Items:**
 - Transform into a **flexible workshop and training area** with computer workstations.
 - Utilize modular furniture (stackable chairs, adjustable tables) to accommodate different workshop formats.

- Equip the space with a projector, large display/whiteboard, and sound system.
- Integrate whiteboards and corkboards throughout for brainstorming.
- Consider converting an adjacent smaller office into a recording booth if needed.
- For the MVP, minimal rearrangements may be required—focus on cleaning and organizing the space.

H. Owner's Office

- **Current State:** Private administrative office.
- **Planned Changes & Action Items:**
 - Maintain as the administrative hub for managing Film Hub operations.
 - Ensure it remains separate from the coworking and community areas for privacy.

I. Smaller Office Rooms

- **Current State:** Former staff offices; potentially underutilized.
- **Planned Changes & Action Items:**
 - Convert into versatile flex offices for private work or dedicated editing bays.
 - Install basic sound treatment in editing bays.
 - Keep furnishings minimal and flexible.
 - Integrate these rooms into a booking system for members' reservations.

J. Main Stage

- **Current State:** Primary soundstage with concrete flooring, cyclorama, grid system, and equipment storage.
- **Planned Changes & Action Items:**
 - Maintain the stage as the core production area while integrating member access at discounted rates.
 - Consider enhancements such as:
 - Options to offer additional cyclorama colors or modular backdrops.
 - Upgrading the grid system for easier power access and rigging.
 - Installing a stage lift to improve equipment setup.
 - Reorganizing adjacent storage rooms for better accessibility.
 - Integrating "On-Air" signage and ensuring safety compliance (fire exits, clear perimeters).

K. Wardrobe & Makeup Rooms

- **Current State:** Standard production support rooms.
- **Planned Changes & Action Items:**
 - Keep functional and well-maintained.
 - Conduct an inventory to determine if any upgrades or additional supplies are needed.
 - Focus on client comfort and ease of access during shoots.

L. Restrooms & Shower Facilities

- **Current State:** Functional but basic.
- **Planned Changes & Action Items:**
 - Upgrade fixtures, improve lighting, and repaint for a cleaner, more upscale appearance.
 - Ensure odor containment through fan repairs, door sweeps, and improved ventilation.
 - Stock with inclusive toiletries (toothpaste, mouthwash, pads, tampons, hand lotion) and consider adding LED guide lights for accessibility.
 - Maintain cleanliness as a priority, especially for the MVP phase.

M. Access & Security (Across the Facility)

- **Current State:** Various codes and keys are in use (as detailed in your “Pollution Studios x Keys x Codes x Access” document).
 - **Planned Changes & Action Items:**
 - For the MVP, use simple keypad entry systems (mechanical or basic electronic locks) for key access points.
 - Clearly label rooms and entrances with color-coded or flip-card occupancy signs.
 - Long term, plan to integrate an electronic access control system (mobile app integration or key fobs) that centralizes all door and zone management.
-

3. Roadmap & Phased Implementation

MVP Phase (Proof of Concept)

- **Quick Wins:**
 - Deep cleaning of all areas (entrance, coworking zones, equipment room, kitchen, restrooms).
 - Replace or supplement dim/dingy lighting with brighter bulbs.
 - Rearrange existing furniture to define zones (entrance, coworking, kitchen café area, workshop space).
 - Install basic check-in system at the entrance.
 - Use temporary signage (door hangers/flip cards) to indicate room occupancy ("Available," "Occupied," "Join In").
 - Set up modular, temporary whiteboards/corkboards in key areas (workshop, coworking, writer's room).
 - Ensure immediate safety upgrades (repair bathroom fan, add door sweeps, weatherstrip roll-up doors).

Extended Roll-Out (Long-Term Enhancements)

- **Comprehensive Renovations:**
 - Repaint walls throughout the facility with chosen neutral or accent colors.
 - Invest in modular furniture systems (reconfigurable sofas, mobile desks, adjustable tables).
 - Upgrade equipment rooms with professional shelving and inventory systems.
 - Install advanced audiovisual equipment (calibrated displays, projectors, HDMI switchers/wireless presentation systems).
 - Implement robust soundproofing measures in critical zones (screening room, editing bays, workshop).
 - Transition to an integrated electronic access control system.
 - Enhance exterior aesthetics (updated signage, improved landscaping, streamlined entry systems).
-

4. Shopping/Procurement List

- **Lighting & Electrical:**
 - Brighter bulbs (including options for Wi-Fi-enabled control)
 - Additional light fixtures for hallways and workspaces
 - Replacement light fixtures for bathrooms and screening room
- **Furniture & Storage:**
 - Modular furniture pieces (sofas, chairs, mobile desks, adjustable tables)
 - Commercial-grade carpet tiles or durable rugs
 - Efficient shelving systems (for equipment room, kitchen, photo studio)
 - Storage cabinets/closets for photo supplies and member storage
- **Decor & Aesthetics:**
 - Plants (low-maintenance varieties for indoor air quality)
 - Inspirational posters, framed mantras, and art for walls
 - Whiteboards and corkboards (plus accessories like markers and pins)
 - Accent elements (curtains/partitions to hide unsightly areas)
- **Kitchen & Café Amenities:**
 - Second refrigerator for member food storage
 - Microwaves and coffee shop essentials (espresso machine, utensils, mugs)
 - Small freezer or vending machine for snacks
 - Water filter system for tap improvement

- **Tech & AV Equipment:**
 - Basic check-in system (tablet/iPad stand and printer)
 - HDMI switchers/splitters (for workshop/projector setup)
 - Calibrated large display (for screening/color grading)
 - Projector (optional, for presentations/workshops)
 - **Access & Security:**
 - Keypad entry locks (for main and interior doors)
 - Temporary occupancy indicators (flip cards, door hangers)
 - Weatherstripping and draft stoppers for roll-up doors
 - Basic alarm system accessories (if updating from Simply Safe)
 - **Soundproofing & Maintenance:**
 - Acoustic panels for screening and coworking areas
 - Materials for door sweeps and insulation upgrades
 - Cleaning supplies for deep cleaning and regular maintenance
-

5. Additional Considerations for Access & Keys

- Review and reassign current access codes (as per the “Pollution Studios x Keys x Codes x Access” document) for clarity.
 - Implement simple, color-coded door labels initially, then transition to an integrated system.
 - Establish a schedule or digital booking system for shared amenities (e.g., laundry machines, meeting/workshop rooms).
-

Final Notes

This document serves as a living plan—you can update each section as new ideas emerge or as initial proof-of-concept feedback is gathered. The MVP phase focuses on quick, high-impact changes that demonstrate functionality and set the stage for more extensive renovations later. Over time, integrating more advanced furniture systems, AV upgrades, and electronic access management will further elevate the space.

Let me know if you'd like to adjust any sections or if there are additional details to incorporate.
